

HAVE YOU TALKED TO YOUR DOCTOR ABOUT RITUXAN?

The more your doctor knows about you, the better he or she can help treat your rheumatoid arthritis (RA). If you haven't talked with your doctor about Rituxan® (Rituximab), review the questions below and bring them to your next appointment. It will help you and your doctor decide if Rituxan is right for you.

- What medicines are you currently taking for your RA?

- What medicines have you taken for your RA in the past?

- Do you still struggle with daily activities such as grasping a fork or buttoning a shirt?

- How long does your morning stiffness last?

- Have you had to miss work in the past month because of your RA?

- Have you had to miss out on family or social events because of your RA?

- Does your RA interfere with your hobbies or relaxation activities?

- Has your current treatment been working consistently?

- Have you recently experienced more, or more severe, RA flares than in the past?

- Are you satisfied with the convenience of taking your current RA treatment?

INDICATION STATEMENT

Rituxan® (Rituximab), in combination with methotrexate, is indicated to reduce signs and symptoms in adult patients with moderately-to-severely active rheumatoid arthritis (RA) who have had an inadequate response to one or more TNF antagonist therapies.

IMPORTANT SAFETY INFORMATION

Rituxan® (Rituximab) can cause the following serious side effects, some of which could be life threatening: infusion reactions, tumor lysis syndrome (TLS), severe skin reactions, and progressive multifocal leukoencephalopathy (PML). Other serious side effects with Rituxan include hepatitis B virus reactivation, heart problems, infections, and stomach and bowel problems. If you experience any symptoms or side effects during or after Rituxan treatment, seek immediate medical attention.
